Go Live

The screenshot shows the Visual Studio Code interface with a project named 'alfidoteck'. The Explorer sidebar on the left lists files: 'node_modules', '.dockerignore', 'app.js', 'docker-compose.yml', 'Dockerfile', 'package-lock.json', 'package.json', and 'README.md'. The main editor area displays the terminal output of a Docker build command. The terminal shows the execution of 'docker compose build', which includes steps for exporting layers, manifest, and image, naming the image, and resolving provenance. The build process is completed successfully, and the terminal shows the command 'docker compose up -d' being executed, which starts the 'mongo' service.

```
PS C:\Users\SONU MANDAL\Desktop\alfidoteck> docker compose build
